BB PAINT GELS

The BrillBird color paint gels are very special. They are based on a very strong base-gel, and contain huge amount of finely grinded „paint” pigments, so they cover perfectly even in a thin layer. They will remain vivid. It is a dream to paint, to do one move technique, to shade and to contour with them, on every level. You should use them in a thin layer. Brill Top Gel also helps their cure. With a help of a new trick, you can do aquarelle technique with them, you should simply dilute them with a brush, which was previously dipped into Cleaner.

GOLD SKY VIOLET PURPLE OLIVE

APPLIED ON AN OTHER COLOR

You can give the Cat Eye effect to any darker shade of gel or Gel&Lac with the new Cat Eye Effect Gel&Lac. You have to choose (preferably) a darker shade as a base, what gives a perfect coverage. Apply one layer of Cat Eye Effect Gel&Lac over it. Before you cure it, use the BrillBird Cat Eye magnet – in the way written above – in order to get the Cat Eye effect. Cure it for 3 mins and apply a layer of Top Mani Gel&Lac. In case of gel or professional Gel&Lac products you can apply the Cat Eye Effect Gel&Lac on their sticky (non cleansed) surface. In case of cleansing free products (Brush&Go gel and Brush&Go Gel&Lac, etc.) use the buffer gently on the nail surface before the application of the Cat Eye Effect Gel&Lac. Always use the magnet before the curing. As the last step apply the Top Mani Gel&Lac cover shine.

LIQUID METAL

BRILLBIRD

LIQUID METAL STEP BY STEP

1. Apply a layer Brush&Go Gel&Lacot (GoGL21) to the prepared nail. Seal the edges then cure it for 3 mins in the UV lamp.

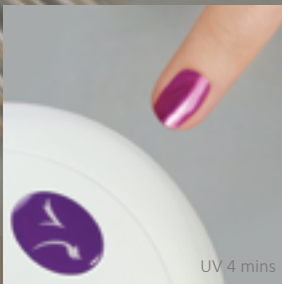

2. Apply the previously shaken Liquid Metal colors in a VERY thin layer, with quick movements. Apply the color only one place at once! DO NOT SEAL THE EDGES!

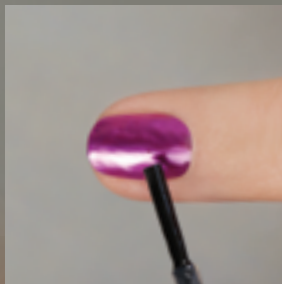

3. Always cure the color for 4 mins in the UV lamp. This is essential, even if it seems dry.

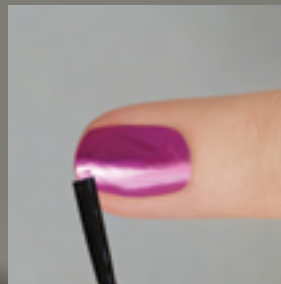

4. If necessary, apply another layer of Liquid Metal color, according to the previous details, with fast movements, paying attention not to seal the edges with the color.

5. Cure the 2nd Liquid Metal color layer for 4 mins, even if it seems dry.

6.. Apply the Liquid Metal TOP nail by nail, and cure them one by one. This TOP was especially developed for the Liquid Metal colors. Apply it fast, seal the edges and immediately start to cure the nails.

7. Cover the nails with Mani Gel&Lac TOP, cure the nails in the UV lamp for 3 mins, then cleanse it.

DONE! - IMPORTANT! You don't have to use Liquid Metal Top for the Real Silver and Real Gold colors, you can use them in the ordinary way, covered with Brush&Go Gel&Lac (GoGL21). But the new Liquid Metal colors only work perfectly with the new TOP!

Order: degreasing, matting, Nail Prep or Spray Prep and Primer 1. Then create the base with Bond Gel. Apply the color layers(1, or if necessary 2 layers) then cover the nail with TOP clear GEL&LAC.

Tricks: the 15 ml bottles have a flattened silicon brush for nicer, easier coverage. (Always use the brush with its flattened side on the nail.) Needs to be applied thinly. The free edges need to be covered with all layers, and it cannot contact skin!
